Engineered Rigging Continues Staff Expansion

VALPARAISO, IND., June 29, 2023 – Engineered Rigging recently hired two talented professionals: Andy Moore, P.E., as project engineer and Peyton Reed as a cost accountant.

Moore (below, left), a graduate of Arkansas Tech University, holds a Bachelor of Science degree in mechanical engineering and is a licensed professional engineer. His experience includes work as a field engineer, product manager, and war room coordinator for entities

that include Entergy, Princeton Plasma Physics Laboratory and Whirlpool. He will use his strong field engineering and design-build experience to assist the company's growing client base.

Reed (on right), who graduated from Lewis University with a degree in finance, will use his experience in budgeting, forecasting, cost accounting

and financial modeling to help manage the heavy lifting company's financial reporting and accounting tasks. Previously, Reed worked at Chadwick Electronic Recycling, Corteva Agriscience and Northern Trust Wealth Management.

"Engineered Rigging is fortunate to have a talented, experienced team across all functions of our organization. We look forward to Andy and Peyton's contributions to our efforts," said Christopher Cox, P.E., co-founder and president of Engineered Rigging.

About Engineered Rigging

Engineered Rigging (ER) is a global innovator in heavy lifting. By leveraging decades of experience and technical expertise, Engineered Rigging overcomes the most complex logistical challenges for a variety of industries. The company provides engineering services, design-build solutions and heavy lifting and specialized transport equipment rentals, sales, service and support.
