### Engineered Rigging Expands Equipment Fleet with Six Holmatro 400-Ton Skidding Systems

**VALPARAISO, IND., October 30, 2025** — Engineered Rigging, an innovator in heavy lifting and rigging solutions, announced a significant investment in its national bare rental fleet with the purchase of six [Holmatro 400-ton Skidding Systems](#). This strategic expansion dramatically increases the company's capability to support synchronized, high-capacity horizontal load slides across the United States.

This skidding system's unique ability to safely transport loads over a relatively large, unsupported span makes it indispensable for rail-side transfers and challenging infrastructure projects nationwide.

"We have seen an increase in demand for reliable, scalable rigging and specialized transport solutions for large projects across the United States. By stocking six 400-ton skidding systems, we eliminate logistical bottlenecks and expedite the delivery of high-capacity, precision equipment, when and where our clients need it, for complex lateral moves," said Mike Beres, vice president of Engineered Rigging.

Engineered Rigging is dedicated to providing reliable, scalable solutions that enable clients to overcome project challenges such as difficult foundation conditions that require loads to span uneven surfaces.

#### Technical Advantages for Complex Projects

The Holmatro 400T system is the industry standard for precision horizontal movement, offering specific benefits that translate directly into operational efficiency:

- **Equal Push/Pull Capacity:** Double-acting cylinders deliver 400 tons of capacity in both the pushing and pulling directions, providing absolute control and accuracy for bi-directional slides.
- **Modular Rigidity:** The system utilizes extremely rigid steel beams, allowing it to span unsupported gaps common in uneven or pre-existing foundations.
- **Synchronized Control:** Powered by a [hydraulic split-flow pump](#), the system ensures all skid units move simultaneously, eliminating alignment risks and enhancing safety during delicate final positioning.
- **National Deployment Readiness:** With six systems now committed to stock, Engineered Rigging ensures immediate availability for both short-term needs and large-scale, multi-site deployments.

### An Array of Options

In addition to the Holmatro 400T skidding system, Engineered Rigging's rental fleet includes a variety of technologies for horizontal moves including the Holmatro 200-ton Lightweight Skidding System, the Power Slide PS500 System, self-propelled modular transporters (SPMTs), robot dollies and more. All models are available for rental and sale. A [Tech Talk article](#) provides additional insight into effective solutions for machinery slides.

## **100% Rental Ready Performance Guarantee**

The 400T skidding system and every rental asset is backed by Engineered Rigging's safety and performance guarantee which ensures every asset in the company's fleet is a best-in-class product that is properly stored, meticulously maintained, thoroughly cleaned, inspected and rigorously tested before shipment. ## **About Engineered Rigging**

Engineered Rigging provides pioneering heavy rigging solutions for a variety of industries around the globe. Leveraging decades of hands-on experience and technical expertise, we help clients overcome the world's most intricate lifting challenges and complex machinery moves. Engineered Rigging empowers our customers with comprehensive equipment rental, sales, and preventive maintenance, engineering innovation, custom solutions and unwavering technical support. ## **About Holmatro**

Founded in the Netherlands in 1967, The Holmatro Group is a leading global supplier of high-pressure hydraulic equipment for Rescue, Special Tactics, Rerailing, and Hydraulic Solutions. With divisions in the Netherlands and the USA, and represented in over 160 countries, Holmatro is a major worldwide leader in innovative hydraulic tool solutions. "Mastering Power," their tools are developed to ensure users can apply extreme power in a controlled, practical, and safe way, even in the most unfavorable circumstances. They maintain a commitment to providing reliable, safe tools under all circumstances. For more information, visit <https://www.holmatro.com/en/industrial>.
